## **Project Manager – Geophysics**

Aurora Geosciences is a mineral exploration consulting company that has been operating for over 35 years and has offices located in Whitehorse, Yellowknife, and Juneau AK. Aurora is seeking a Project Manager of Geophysics to oversee geophysical surveys based out of the Whitehorse office. This is a full-time, permanent position based in Whitehorse, YT.

Reporting directly to the Vice-President, the project manager would be responsible to organize, supervise and direct geophysical surveys. This is an office and field-based position. Candidates should be prepared to work in a professional office environment conducting research, data processing and writing of technical reports as well as being physically fit and capable of working in remote and rugged areas under various climatic conditions and be prepared to travel extensively.

Responsibilities include:

- Geophysical survey design, planning and execution
- Manage field crews and survey data
- Provide training and supervision to field crews
- To prepare field, technical, assessment and other reports
- Assist with sales, project proposals and client relations

The ideal candidate will have:

- Professional registration as a geophysicist in Canada
- The ability to efficiently manage multiple projects
- Practical and professional experience delivering geophysical services and field operations
- An understanding of the logistical and operational challenges of conducting mineral exploration in the Yukon
- Effective written and verbal communication skills
- Proficient computer and other technology-related skills
- The ability to effectively manage a large number of conflicting tasks and priorities
- Excellent time and stress management skills
- The ability to lead, manage and train employees

This is a salaried position with benefits including medical, dental, disability insurance and professional development allowance. Interested applicants are encouraged to apply in confidence to:
